Kettle Dollies

Make Kettle Handling Easier and Safer

Move Your Kettles With Ease

The Savage Bros Kettle Dollies provide a safe, mobile solution for holding, transporting, and positioning hot or cold kettles between processing stations. Available in two sizes, they accommodate kettles of different diameters while providing stable support and easy maneuverability throughout your production area.

With the optional drip pan, the larger dolly can also accommodate the Savage Bros Portable Agitator while conveniently collecting drippings from the scrapers, helping keep your work area cleaner and more efficient.

KEY FEATURES

1. Stainless steel construction for strength, durability, and easy cleaning
2. Mounted on four casters to enable the dolly to move easily between processing areas
3. Two of the four casters have locks for added safety and to keep the dolly securely in place
4. Compatible with Savage Bros copper and stainless steel kettles for versatile processing applications
